New PVP Stone Rumble content open3. Bug fixes I've been playing this game for almost 2 years and loved every second of it. I've been to the finale now for a good amount of time and I really want to do PVP. After running all the scenarios 100 times I just want more in the game. Or it must be PVP... Or content other than scenarios. I'm not sure what other content would be good, but it would be nice to see some variety. Basically my game surrounds Glut and TOC. Which has become repetitive. But aside from the different PVP content in this game needs MALE help! BattleField is only part-time... And you don't get any reward for that. On your stats there is a part where your rank should be ... But it's broken!! I was on Plat 2 and he doesn't show up. I think BattleField should be all year round. And every month a new season begins. And there should be rewards for winning those seasons. You could be very creative with it. Personally I love MMO's for the PVP at the finale... And after 2 years they didn't touch the PVP. ADD MORE TO PVP!!!! There isn't much explanation as to how to do things other than crossstones, but other players will help you and make this mmorpg very cohesive and friendly. There was a problem with rubies early today. I contacted Supercat (the developer) and they fixed the issue almost immediately for everyone who had this issue. I'm going to recommend it to others. The game is moderately fun, but it's so clearly and blatantly a money take-up that I just can't overlook it. The VIP system is pretty disgusting in the sense that you actually lose the top-tier VIP status if you don't keep spending about \$40 a month in the store. This is just criminal charging so much for some extra rewards a day in a sub par mobile game. The VIP system should be progressive without decreasing the status or being a small flat rate like \$5 per month. There are multiple packages in the which are close to \$100... I don't mind spending some money on a game if I like it, as I have the luxury of disposable income, but this game is on another level. The gameplay honestly doesn't ensure such high prices on everything. Localization is also pretty bad. I just surprised that this game seems to be so appreciated.
